\*\*Tax is only calculated on water usage for residential meters.  
 Tax is calculated on both water and sewer for commercial meters. The estimates above do not include commercial sewer sales tax!

This posting is informational only. It does not give calculations for every possible quantity of water/sewer usage.

Gladbrook Water Board Utility Rules, Res. 06-12WB allows for the annual increase of the water rate by the previous calendar year's CPI rounded up or down to the nearest 5¢. The CPI for 2017 was 1.6%. Ordinance 128 sets the sewer rate based on the 2016 Lagoon Project.
